EXCHANGE INFORMATION

Our Exchange: an overview

NTE combines its ability to strategically execute on all transportation services with its flagship e-commerce solution, the Exchange. At its core is a virtual marketplace to bridge the procurement gap between shippers and carriers. The Exchange offers a user-friendly trading platform where both parties gain efficiencies, visibility and control.

Retailers, manufacturers, distributors and third-party logistics companies use NTE to quickly, easily and economically address all of their ground capacity needs. Private and contract carriers—both truckload and less-than-truckload—count on NTE to optimize their capacity.

To experience the benefits of the Exchange firsthand, enroll online for [Free Membership](#).

THE EXCHANGE

How the exchange works

How the Exchange works is simple. Both shippers and carriers identify their available shipment or capacity needs and their business requirements. NTE collects shipment orders, computes a market price for each one and matches them to truck routes provided by carriers.

The Exchange automatically filters their requirements to identify compatible trading partners. Trades are typically executed within a couple of hours. When the delivery of the shipment is confirmed, NTE pays the carrier and bills the shipper.

Members save time and phone calls, and they gain world-class performance results.

What does that mean for you?

FEATURES & BENEFITS

NTE Exchange features include:

- Membership — to ensure a vibrant marketplace, trading is reserved for pre-qualified companies that agree to governing rules and certain standards
- Profile Services — define customer trading requirements and business rules for consistency and quality
- Simple Access — connect system-to-system, using a standard Internet account, or through a simple phone call or fax
- Shipment Status — view status updates of shipments for ongoing control
- Financial Settlement — NTE collects from the shipper and provides timely payment to the carrier

Shipper Benefits:

- Achieve world-class performance standards
- Streamline procurement processes
- Execute all shipments
- Reduce transportation and transaction costs
- Increase logistics control and visibility
- Lower loss/damage rates

Carrier Benefits:

- Improve fleet utilization
- [Read more about the new continuous moves feature.](#)
- Decrease deadheads and increase backhaul rates
- Improve cash flow and profits
- Reduce bad debt risk
- Improve operating efficiency
